

System Performance Network  
Notes for the April 3, 2018 meeting

Dave asked for each member to provide an update on the presentation of the Client Update report that Jack created earlier in the year. Melanie, Erin Lori, and Susan have presented the report to their Local Housing Coalition. Jordan, Ben, Jeanne, Kelly, Jeremy, Veronica, Paul and Johneisha will present either in April or May. So far, LHC have been receptive to the information and it is facilitating conversation about the importance of updating client records during their stay in program. Those that haven't presented yet, will report back at the next meeting.

Dave presented updated web reports created by Jesse Dirkman. The online report allows users to examine summary and detailed information on Length of time Homeless and new homeless client counts. Current and historic information is available within the report.

As discussed at the previous SPN mtg, Jesse Dirkman has produce an updated System Performance Worksheet focused on Length of time homeless (measure #1). Dave presented this worksheet and the process for committee member to customize the report for use at the LHC. After demoing the process, there was discussion about the questions and how the responses should be compiled.

The floor was opened for additional question, comment or agenda item suggestions and the meeting was adjourned.
